

to all CVRC Club members and to those that may not be as well.

This past issue of Model Aviation had a special Pre Cover on the front. It asked for all AMA members to post their comments about the future of the FAA Interpretive Rule.

The Questions below were asked with an extended special comment period set to end Sept. 23 2014.

#1 Are you a Model Aircraft enthusiast?

#2 Do you enjoy flying First Person View?

#3 Are you a sponsored Pilot, fly in competitive Events, or enjoy watching companies demonstrate products?

#4 Do you fly within 5 miles of the more than 17,000 Airports in the US?

#5 Does your club manage its own flying site in a safe and responsible manner?

#6 Do you or your club members fly in "controlled" Airspace?

I must point out to all non AMA members that the Academy is the ONLY National Entity that is LOBBYING on your BEHALF. THE ONLY ONE.

I am not promoting AMA but I must point out that The CVRC Club is barely within the 5 mile radius of Jackie Cochran Airport.

I also must point out that the Southwest C/Church is within 3 miles or less of Bermuda Dunes Airport, we are both flying within that 5 mile stated radius.

Please Note to Kevin at Uncle Dons, Please send this request out to your customers. PLEASE as we all are in this together.

Again if your NOT an AMA member you should be because they are the only national entity acting on behalf of our ALL of our model flying interests.

Send your comments by email to www.regulations.gov search for Model Aircraft.

Or send your comments by Fax to 202-493-2251

Please create your own thoughts as the FAA recently deleted over 14,700 comments that were generic and repetitive .

Thank you all for your attention to this very important matter.

DO IT NOW, DO IT TODAY.....

Respectfully,

Daniel Metz

President of the CVRC Club.
